

## Commissioning Leads Gas Processing Plant, Nigeria

We urgently require two experienced **Commissioning Leads**, working back to back, to commission and start up an onshore gas processing plant in Nigeria. Your team will represent the Owner, reporting to the Commissioning Manager, and will use the *PathMaker TestIT* completions management tool.

Dayrate is negotiable and paid in Pounds Sterling (GBP). Package includes flights, accommodation, utilities and transportation. The position is for approximately eighteen months on 28:28 rotational basis, commencing May 2008 with 6 weeks familiarisation in Korea.

You will be an experienced Engineer with recognised academic qualifications, and a proven track record of representing both Owner Operators & EPCs in the commissioning and start up of oil & gas processing facilities, specifically gas plants. Reporting to the Commissioning Manager, you will be responsible for ensuring the safe and timely startup and handover to Operations of the project. You must be a good communicator, with excellent leadership and man-management skills. You will have English as your first language and must possess a high level of computer literacy. You will be able to diagnose and solve problems.

Intensive training in the use of *PathMaker TestIT* will be given from our UK office prior to mobilisation. Previous knowledge of *PathMaker Systems* or similar relational database Commissioning Management Systems will be an advantage.

If you are suitably qualified and genuinely interested in this position please email your CV in MS Word format to [recruitment@falconglobal.net](mailto:recruitment@falconglobal.net). Clearly indicate your availability, expected dayrate and personal health status.

Falcon Global Ltd is an equal opportunity employer and actively encourages all qualified applicants to apply.
